

CLEANING PROTOCOL FOR TRAILERS & BULK LOADERS

Before use:

- Brush out and remove any debris from the trailer/bulk-loader bucket
- Pressure wash, ensuring that there are no visible signs of dirt or previous transported grain or feed, and leave to **dry thoroughly before reuse**. Where appropriate, subsequent use of a food-grade sanitizer is recommended.
- Check lights, mirrors, fittings etc to ensure that no pieces of broken glass or plastic enter the animal feed or grain being transported.

Report any damage to:
